

-Instructions to use the Activity Photo slide show player-

Clicking on the small thumbnail photos will enlarge them and bring up the slide show player. The photo player control buttons will appear if you move the cursor to the top center of the picture area. The white triangle is the Play button and clicking on it will start showing the photos at 5 second intervals. You can click on the other buttons to Pause, manually go Forward, Backward, move the photo window or return to the thumbnails (X). There is also an 'Expand' button, but it will be grayed out if you have reached the maximum slide show size.

Note 1: This info applies to most activity photo's starting in 2008

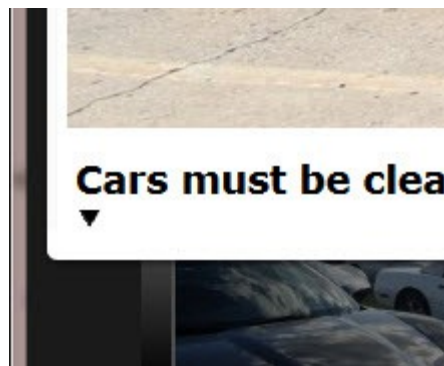

Player control buttons.

-Instructions to download a copy of a slide show photo-

There is a small black triangle in the text "Comment" area at the bottom left of the photo window. Click on the small black triangle and the picture will start downloading to your computer. When the photo is downloaded, Right click on the photo, then select "Save as" to save it to your harddrive or memory stick. You can then use a photo editing program to crop, enhance, add graffiti, whatever, and then email, print at home, or take to Sam's Club, etc., to print.

Note 2: You can always download the "Original", but not all of the Originals are high resolution photos - you will only get as good as I received.
